*Setting the Standard in Quality Sun Rooms*

# Expand your life style

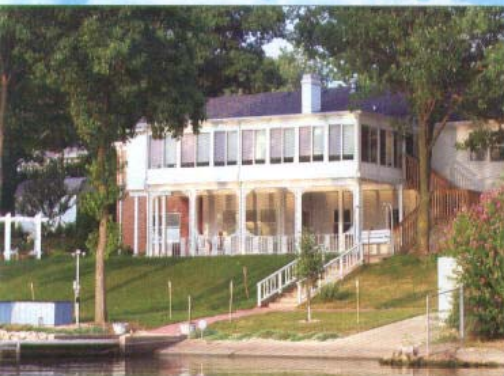

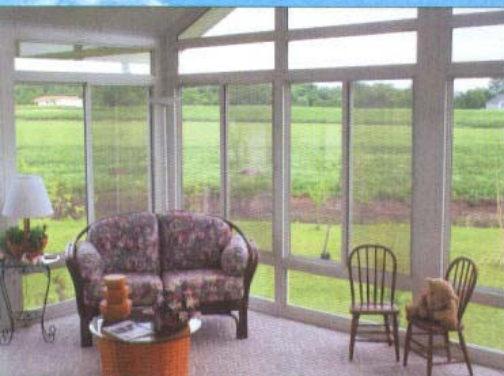

Home is a *haven*. A *refuge*. A *destination*. Home is the one place where we can truly be ourselves. It calls to us even when we are far away. It's not a surprise that you want to add a Sun Room to your house.

There are many reasons for adding a SRC Sun Room on your house, whether it be entertaining, dining, lounging, playing or even your own personal exercise room, your custom-built room featuring our extensive use of windows and optional skylights bring the beauty and colors of the great outdoors into the comfort and security of your home. So kick off your shoes and enjoy whatever it is you want your room to be... every day of the year.

Our updated window and insulating wall systems opens your living space to the beauty of the natural environment. And we custom design each Sun Room to fit your lifestyle. From our three-season Sun Room to our thermal insulated, four season Sun Room, we can adapt to any environment and any comfort level you desire. And with our exclusive "Virtual Showroom" presentation and design program, we can help you create the exact room you desire and "take you on a tour" of that room... eliminating the misconception of what you "think" your room will look like.

**Whatever your interests or weather... your Sun Room will be your own personal resort and provide more enjoyable living space.**

**Your Sun Room will provide lasting beauty and wonderful functionality....**

Sit back... relax... and enjoy. You will soon discover a new comfort zone in your life with your new room from Sun Room Concepts. Take comfort in knowing that each and every day your "resort" awaits you when you arrive home. Relax in knowing that your room offers the absolute finest in materials and workmanship. And Enjoy your room for whatever lifestyle you have chosen for it to provide. You'll find your new room will be the destination of choice for all your leisurely pursuits.

SRC

Sun Room Concepts

Poly Fab Industries, Inc.

a MacArthur Co. - since 1913

## **A solid foundation**

Sun Room Concepts understands the importance of your complete satisfaction and in making sure you will relax and enjoy your new room, whatever it's intended usage. And you can take comfort in knowing your decision to purchase a Sun Room Concepts room as a smart choice by knowing that thousands of homeowners like yourself across the country enjoy their maintenance-free room... every day of the year.

As a division of the MacArthur Company - founded in 1913 - Sun Room Concepts has a long history of satisfying homeowners with superior materials, construction and customer service. Every Sun Room Concepts product is manufactured in this long-standing tradition of quality to provide years of enjoyment.

## **With a warranty to match**

All SRC Sun Rooms feature a Transferrable Lifetime Limited Warranty - see warranty for complete details.

**Relax and enjoy!**

## SolaraCool Solarium Enclosure

Each *SOLARA-COOL* Solarium Enclosure is custom designed to fit your particular lifestyle. Our design flexibility allows us to custom design your *SOLARA-COOL* Solarium Enclosure to blend with, or complement your existing home's architecture.

In your custom designed *SOLARA-COOL* Enclosure, you will enjoy outdoor living with all the comforts of being indoors. The Curved Glass features SolarCool Gray Reflective Tint, and "Low-E" to block out harmful sun rays that damage and fade furniture, yet allows you to enjoy the warmth of the sun and your surroundings.

### Solara-Cool Solarium Enclosure

#### Features & Options:

- Available in three models: 2500, 3500 and 4500 series.
- Able to "clearspan" up to 16' in all snow (roof) loads up to 40 lbs. per square foot.
- ONLY safety glass is used in curve.
- All models feature SolarCool Gray Reflective Tint and "Low-E" in the curved glass.
- All models feature a continuous top roof mullion with full-length gaskets.
- The *SOLARA-COOL* system is designed with a 3/8"-12 roof pitch to fit most homes.
- Two choices below the operating windows: insulated panels - standard, 15" tall tempered lower transoms.
- Three choices above the operating windows: Insulated panels - standard, 15" tall tempered transoms, optional dealer-built custom trapezoid transoms.
- 3-1/2" insulated roof system with 26-gauge steel facings "R-16" insulated value.
- Choose either SRC Sun Room door or a sliding door (end walls only).

## **RAISING the Standard in Quality Sun Rooms**

### **SRC introduces NEW and IMPROVED technologies**

#### **"SHP 5000" Glass**

*SHP 5000* is an SRC exclusive glass package system. *SHP 5000* is a Solar High Performance glass package designed to protect your furnishings from the damaging Ultra Violet rays of the Sun. Up to 86% efficient. *SHP 5000* also blocks out up to 84% of the Solar Heat Gain from the sun.

#### **"Poly Foam" Insulated Wall Systems**

*Poly Foam* is also an SRC exclusive wall insulation system. *Poly Foam* is a polyisocyanurate insulation which carries up to an R-19 rating, which is either equal to or more energy efficient than your conventional house wall. *Poly Foam* offers 45% More Insulation Value than EPS products used by many other manufacturers. An additional advantage of SRC's *Poly Foam* is that it meets all fire test requirements of the New Building Codes, where as most EPS products do not!

#### **"Fire Lock" Insulated Roof Systems**

*Fire Lock* is an SRC proprietary Fire Tested insulated roof system. SRC *Fire Lock* roof systems use "Dura-Spec" High Density rigid polystyrene insulation exclusively. *Fire Lock* roof systems are available in either 3" or 4-1/2" thick. The correct roof system is dependent on the size of your sun room or the insulation value desired. Up to R-20 is available.

Above numbers used in SRC 4500 room.

# Whatever season... whatever reason SRC has the perfect solution to fit your lifestyle!

## Wall System Choices

All SRC Sunrooms use the heaviest aluminum extrusions in the industry for the greatest strength. Either 2-1/2" or 3" thick wall depending on model. SRC products either meet or exceed all building codes including the new fire code requirements with our aluminum double I-beam wall members and our *Poly Foam* wall insulation.

All SRC Sun Rooms continue to feature prime residential AAMA certified windows (16 years), now with *SHP 5000* tempered glass. Not old fashioned storm windows like many competitors.

All SRC Sun Rooms are available in either White or Driftwood Colors. The standard interior & exterior insulated Stucco or Rough Sawn wall finishes are also available in either White or Driftwood colors and can also be custom colored to match your existing home. SRC also offers *Kevlor-Tech* for a permanent vinyl exterior finish.

## SRC 1500

The SRC 1500 is a high quality screen room. An exclusive feature is that it can be converted later to a glass room.

## SRC 2500

The SRC 2500 is our most popular three season sun Room. It features our *SHP 5000* glass in a single glazed form.

## SRC 3500

The SRC 3500 is our extended three season or four season (in many climates) sun room. It features double *SHP 5000* glass insulated units.

## SRC 4500

The SRC 4500 is our all season sun room that features both a thermally broken wall system and double *SHP 5000* glass insulated units.

## Exclusive Features

SRC's Double I-Beam extrusions are the strongest in the industry, ensuring that your walls and wall connections will last a lifetime, even in the harshest conditions.

SRC's *Fire Lock* roof system uses 26 gauge steel skins instead of aluminum and super-strong plywood splines for the strongest roof system in the industry.

SRC uses brass rollers instead of cheap plastic on our windows, for strength, durability and smooth operation.

SRC's PRIME Sun Room door features an insulated core and *SHP 5000* insulated tempered glass.

SRC's U.L. Classified internal raceway system for easy, concealed electrical installation.

SRC's *Therma-Deck* insulated floor system is the strongest in the industry. It features plywood skins instead of OSB, with an option of *Perma-shield* moisture protector.
