

High Quality Window and Door Products from Polaris Technologies.

DOUBLE HUNG WINDOWS

The Thermal Weld Series 7000 double-hung windows are the American traditional window as designed by Polaris. Tough Polaris vinyl and welded corners provide the strength. Polaris energy SMART[®] glass and multiple weather-stripping provide the comfort and energy savings. Both the top and bottom sash tilt completely inside which helps to make cleaning a snap.

GLIDER WINDOWS

Thermal Weld Series 7000 gliders are maintenance free, and the sash can be removed from the inside for easy cleaning. Full length pull rails permit fingertip operation and the energy efficient interlock at the locking rails virtually eliminates air infiltration and increases thermal performance.

BAY AND BOW WINDOWS

Polaris bay and bow windows are the perfect way to add depth, light, and charm to a living room, sitting room, or den. Polaris engineers will design a window to fit your existing bay or bow opening exactly. You can really improve your view by replacing one of your smaller windows with an expansive bay or bow window.

PATIO DOOR

Polaris patio doors are the ultimate in beauty, efficiency, and security. A wide range of styles and options ensures that your Polaris patio door can be ordered to your exact tastes. Polaris Ultimate Patio Doors are your gateway to a more beautiful, efficient and secure home.

ENTRY DOORS

A door is more than an entrance into your home. Your entryway should project a distinct personality of its own. Polaris Ultra Steel Doors will do that and more. Ultra Steel Thermal Entry Doors offer an outstanding combination of energy savings, security, durability, beauty, and low maintenance. The Ultra Steel Entry System has been designed as a custom system with many choices and options. Ultra Steel would be the proper choice in remodeling applications.
