

ENERGY WALL®

Window System

*energy*WELD™

2-Lite & 3-Lite Sliders

2-Lite & 3-Lite Sliders

EnergyWeld™ sliders are maintenance-free and all sash remove from the inside for easy cleaning. Energy-efficient interlocking sash rails and triple weather-stripping virtually eliminate air infiltration and offer superb thermal performance. All sash operate and glide on brass rollers for effortless fingertip operation. The glide tracks also remove for easy cleaning.

B PPG Intercept® Glass
for thermal performance

A Welded Frame & Sash Corners
fusion welded for superior strength

C Extruded Glide Rail
for fingertip ease of operation

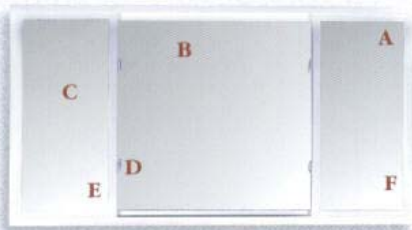

D Heavy Duty Sash Locks
provide a secure locking mechanism

E Sash Limit Locks
allow for secure partial ventilation

F Heavy Extruded Aluminum Screen Frame
for strength and durability

TempEST® Glass

Polaris® TempEST® glass is stronger than regular window glass. Standard windows are made from single strength glass. Some would have you believe that double strength glass give you double the strength. The same thickness of Polaris TempEST glass is **at least four times stronger**. It can withstand impacts of up to 12 tons per square inch. A window this strong can protect you and your loved ones from the unexpected punishment of violent weather, accidents, and unwanted intruders that can occur every day across the country and in your neighborhood.
