Energy Efficient Vinyl Windows

THERMALWELD

series 7000

Standard Colors

- 1. Cam-Style Lock**
Pulls sashes together for a weather-proof seal while helping keep out intruders.
- 2. 7/8" Insulated Glass**
Using warm edge technology, our units save energy and provide sound insulation.
- 3. Welded Frame and Sash**
Creates one piece construction for superior strength and performance.
- 4. Over and Under Interlock at Meeting Rails**
The unique symmetrical design assures a perfect continuous weather-proof interface between sashes.
- 5. Heavy-Duty Multiple Weather-stripping**
Reduces air infiltration and drafts in the home, making your home more comfortable.
- 6. Sloping One-Piece Sill**
Drains water away from window without weep holes.
- 7. Extruded Lift Rails**
Dependable sash operation because the lift rails are integral parts of the window, not added later.
- 8. Polaris Vinyl Frames**
The finest vinyl formulated especially for improved window performance. Color is incorporated in the compound so that it never wears off.
- 9. Sash Limit Locks**
Allow the windows to be partially opened for ventilation, but limit their travel for security.
- 10. True Position® Balance**
Keeps sash operating dependably for a lifetime of service, by using special stainless steel spring and high-tech nylon cam.
- 11. Recessed Tilt Latches**
Gives the window a smooth, finished look.
- 12. Slim-Line Design**
For increased window area and more attractive sash.
- 13. Tilt-In Sashes**
Cleaning your windows from the inside is convenient and easy.

High Quality Window and Door Products from Polaris Technologies.

DOUBLE HUNG WINDOWS

The Thermal Weld Series 7000 double-hung windows are the American traditional window as designed by Polaris. Tough Polaris vinyl and welded corners provide the strength. Polaris energy SMART[®] glass and multiple weather-stripping provide the comfort and energy savings. Both the top and bottom sash tilt completely inside which helps to make cleaning a snap.

GLIDER WINDOWS

Thermal Weld Series 7000 gliders are maintenance free, and the sash can be removed from the inside for easy cleaning. Full length pull rails permit fingertip operation and the energy efficient interlock at the locking rails virtually eliminates air infiltration and increases thermal performance.

BAY AND BOW WINDOWS

Polaris bay and bow windows are the perfect way to add depth, light, and charm to a living room, sitting room, or den. Polaris engineers will design a window to fit your existing bay or bow opening exactly. You can really improve your view by replacing one of your smaller windows with an expansive bay or bow window.

PATIO DOOR

Polaris patio doors are the ultimate in beauty, efficiency, and security. A wide range of styles and options ensures that your Polaris patio door can be ordered to your exact tastes. Polaris Ultimate Patio Doors are your gateway to a more beautiful, efficient and secure home.

ENTRY DOORS

A door is more than an entrance into your home. Your entryway should project a distinct personality of its own. Polaris Ultra Steel Doors will do that and more. Ultra Steel Thermal Entry Doors offer an outstanding combination of energy savings, security, durability, beauty, and low maintenance. The Ultra Steel Entry System has been designed as a custom system with many choices and options. Ultra Steel would be the proper choice in remodeling applications.

Styleze Your Home

If you want to make a dramatic statement with your windows, choose from the many options available with our ThermalWeld Series 7000 Windows. Whatever your style – double hung, glider, bay or bow, and picture – we have a window for you. Used alone or with other styles, these windows add a touch of elegance to any home's style.

Our Commitment to Quality

Polaris Technologies is one of the largest vinyl window manufacturers in the Midwest, and has been manufacturing window and door products for almost 60 years. Polaris Technologies is recognized throughout the industry as a dynamic leader in product innovations and design. We are often chosen by leading vendors in the industry to partner on the development and prototyping of new industry innovations. Polaris Technologies products are thoroughly tested in-house within our Research and Development facility and also through independent testing facilities. Using AAMA certified extrusions, each vinyl window is manufactured to exacting standards. And whether white or tan, all vinyl components meet or exceed performance requirements established, certified, and monitored by the American Architectural Manufacturers Association. All Polaris Technologies ThermalWeld Series 7000 windows are backed by the industry's best written warranty. We stand behind our products with a Lifetime Limited Warranty. See actual warranty for details.

TempEST® Glass - Optional

Polaris TempEST glass is stronger than regular window glass. Standard windows are made from single strength glass. Some would have you believe that double strength glass gives you double the strength. The same thickness of Polaris TempEST glass is at least four times stronger. It can withstand impacts of up to 12 tons per square inch. A window this strong can protect you and your loved ones from the unexpected punishment of violent weather, accidents, and unwanted intruders that can occur every day across the country and in your neighborhood.
